

URGE COMMON HOUSE

Description

The new Urge Common House and Mason Aleworks project in San Marcos is across from California State University San Marcos. The 21,000 SF project is inclusive of a restaurant, brewing facility, bar, and bowling alley. The restaurant can seat up to 450 people and the facility also has a patio with games, like corn hole and Jenga. Urge Gastropub's brewing operation is Mason Ale Works and is projected to produce 5,000 barrels per year.

This project would not have been possible without Seabreeze Properties, Gary Levitt, Tony Frost, and our construction team.
